Mobile

1. Drop down navigation. Note the different ordering to desktop. You can achieve this with one HTML menu + appropriate CSS.

   Overlays menu on top of page content.

2. Hover/focus effects shown on nav & products - look at component for more details.

3. Icons are all using FontAwesome.

4. Search should be marked up as a semantic and accessible form. Does not need to work (no server-side logic needed at this stage).
